PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of experience designing and shipping production-grade mobile applications across fintech and blockchain. Skilled at translating complex product requirements into scalable, maintainable apps using clean architecture and modern state management, with end-to-end ownership from API and third-party integrations through CI/CD and store releases. **Strengths:** MVVM / Clean Architecture, BLoC and Riverpod state management, REST API integration, Firebase (Auth, Firestore, FCM, Crashlytics), payment gateway integration, and CI/CD with GitHub Actions in Agile environments.

WORK EXPERIENCE

Mobile Application Development

July 2024 – Present

PN Software Pvt Ltd, West Bengal, India

- Architected and developed a Flutter and React Native based blockchain application with secure crypto wallet connectivity and Web3 smart contract integration for on-chain transactions.
- Built a white-label EMI device-financing platform (a customer device-lock app plus an admin/lender app) with Android Device Admin / Device Owner enforcement, managed through a multi-client build pipeline that ships 7+ distinct branded apps from one codebase. Migrated its remote command channel from Socket.IO to push-based delivery (OneSignal/FCM) to improve reliability when the app is killed and cut background battery drain.
- Achievement:** Cut average on-chain transaction processing time by 40 percent by optimizing gas estimation and moving transaction submission to an asynchronous queue.

Software Engineer, Mobile Application Development (Flutter)

July 2023 – June 2024

Saavy Relations Software LLP, India

- Built fintech features across 3+ production Flutter applications using Provider and Riverpod for state management and a repository-based data layer.
- Integrated payment gateways with encrypted transaction handling and added unit / widget tests to catch regressions before release.
- Achievement:** Increased user engagement by 20 percent and cut app load times by 30 percent through UX optimization, local caching (Hive/SQLite), and reduced state rebuilds.

Flutter Developer Intern

February 2023 – June 2023

Threeway.Studio, India

- Delivered 2 production Flutter applications end-to-end, covering UI implementation, API integration, testing, and Play Store deployment.
- Integrated Firebase Analytics and Crashlytics and built a structured error-handling and logging system, raising the crash-free session rate from 94 percent to 99.2 percent.

PROJECTS

Oxifleet - Fleet Management Driver App

Tech Stack: Flutter, Provider, Socket.IO, Firebase Cloud Messaging, Google Maps, Geolocator

- Built a cross-platform (iOS/Android) fleet management app for drivers, with a feature-based modular architecture covering vehicle tracking, bookings, service requests, and documents.
- Implemented real-time driver-fleet communication over Socket.IO and live vehicle/booking tracking with Google Maps and Geolocator, plus biometric auth and Firebase push notifications.

BCSwap - Multi-Chain Crypto Wallet & DEX App

Tech Stack: Flutter, web3dart, Hive, Firebase, Socket.IO

- Built core wallet, swap, and blockchain integration features for a multi-chain crypto wallet supporting Ethereum, Bitcoin, Solana, and Tron from a single seed phrase.
- Engineered a unified multi-chain wallet service handling HD key derivation and address generation across all four chains, with in-app token swapping, cross-chain bridging, staking, and real-time price/transaction updates over Socket.IO.

CERTIFICATIONS

Docker Foundations Professional Certificate - Docker Inc.

GitHub Foundations - GitHub

SSOC Contributor - Open-source contributor, Social Summer of Code

EDUCATION

Bachelor of Technology in Information Technology | 2021 – 2025

JSPM's Bhivarabai Sawant Institute of Technology and Research, Savitribai Phule Pune University (SPPU), Pune, Maharashtra

TECHNICAL SKILLS

Programming Languages: Dart, Kotlin, Java, JavaScript, SQL

Mobile / Frontend Development: Flutter SDK, React Native, Android SDK, BLoC, Riverpod, Provider, GetX, Material Design

Backend / Cloud & Integrations: REST APIs, Dio, Firebase (Auth, Firestore, FCM, Crashlytics), Web3 Integration, TensorFlow Lite

Databases, Tools and Methodologies: SQLite, Hive, Git, GitHub Actions, Docker, Postman, Unit & Widget Testing, Agile, SDLC
